

In resolution #15 regarding Bonnaville-since the city has created a CPC, it seems appropriate for the City to report back to the CPC when they talk to Bonneville.

In resolution #19 regarding city infrastructure and efficiencies-an example would be to set room thermostats at appropriate temperature efficiency levels according to seasons....rooms would be warmer in summer and cooler in winter.

In resolution 21 regarding businesses and organizations-have businesses and organizations demonstrate the proactive measures they are taking and goals they are setting -showing tourists Ashland is not doing Business AS Usual but walking the talk and use these actions as a marketing tool.

In resolution 23 regarding staff: hire a Public Works Director whose education has included current best practices in regards to climate change and to use this education in leadership and planning.

We can't ask others to do what we are not willing to do.
