

Feedback

I don't live near the shelter so can't provide any personal observations about the impact on the neighborhood. I will say that I think it's GREAT that the city with state assistance has stepped up to improve shelter options for those currently unable to provide for themselves. I'm guessing some of the shelter's neighbors become uncomfortable at the sight/proximity of those individuals who are dressed and perhaps behave differently. I'm all for any monitoring of quantifiable "offences" such as increased trash etc. Hopefully the shelter staff and the city can address any egregious behavior(s) and work to balance the need for shelter vs. neighborhood concerns about...whatever they're concerned about. I have personally not heard or read of ongoing problems but that's not surprising since I rarely socialize.

I think any additional shelter in Ashland is needed. Not only because of the Alameda fire from 2020 but the cost of living continues to rise. I have worked with the homeless community at the Rogue Ridge apartments and most of these individuals are lacking basic resources. I believe this shelter is a great start and potentially a new beginning for these people. They all deserve a chance. I also highly suggest that the Ashland Community Center gets the foundation fixed and be open to the public specifically to the homeless population.

The purchase of this shelter was the culmination of wrong decisions made by the City Council and other organizations. "Build it and they will come" is the only way I can think of it during these worrisome times. I bought my home and adjoining lot in the 1990s after moving from a big City in another state. At that time I viewed this town as a wonderful place to live the last portion of my life. But now..... it has evolved into another town....entirely! Our tax dollars are dedicated in larger amounts every year to paying for the homeless who migrated here in even greater numbers because here they were fed/housed/and given handouts while they also daily stand on the streets with their cardboard signs asking for money and then pitch their tents all over town....in parks on streets and then in designated areas which have become overwhelmed with their occupancies. Many of them are obviously addicted to illegal drugs as well. I knew when I moved here that my property taxes would increase 3% every year because of an Oregon law that was put in place years ago. Now I see that many of those tax dollars are dedicated to taking care of these homeless vagrants. I don't live near the vicinity of the shelter that our tax dollars paid \$2 million + for in South Ashland. But I know of others who do and have immediate concerns with their real estate being devalued just because of that decision. As we all know the tourists support our economy somewhat and they also are disenchanted by this situation.

I can't use it... but we need it desperately. Homeless shelters suppress crime and allow the targets and victims of human trafficking an escape hatch. I know it's difficult but failing to shelter nomadic groups harms the entire community. Contact me I'll be happy to elaborate. Short answer is we can't afford not to have shelters.

There is new sign at the upstairs bathrooms at the YMCA. "Private Bathroom" "Five Minute Limit". I asked a worker about the situation. He was reluctant to say very much however he did tell me that a homeless man had been in one of the bathrooms all day and it was difficult to remove him. I asked him if there have been more incidents since the emergency shelter was established across the street and he answered yes. Approximately three weeks ago I was entering the Y lobby and noticed a man sitting in a chair rocking back and forth holding his head and talking to himself. A policeman arrived as I entered the gym. As I was leaving the man was still in the chair and the policeman was outside speaking to someone. The lobby is where everyone of all ages enters. I hope in your quest to obtain information from the community you reach out to the YMCA and listen about the occurrences there. The Y has reestablished its afterschool program and preschool. What additional measures has it had to take to provide a safe place for all of their members and staff to come?

If you build it they will come. Why are you buying and building for people who don't pay taxes here? They aren't citizens. Is there an advantage for the town? Do we want to draw in bums? Wouldn't 2 million be better spent on the citizens that pay their taxes? Look what has happened to Portland. Do we want the same? Does our budget allow for this expenditure? There is a wonderful piece from City Journal written by author Devon Kurtz that speaks of the "Housing First" program and how it has failed. It appears to me this is money down a rat hole. Thank you for allowing us to give you feedback.

<p>I think it should stay open. It provides a lot of help to those in the community. Please keep it open.</p>
<p>Really needed great location! People should give it a chance! Community support would really help! Give it a chance and see if it works out!</p>
<p>Protect the neighborhood around the the shelter for vagrancy crime and trash. That means strict enforcement and removal of stay privileges if not compliant. We love to "help" people but we do not have the will to protect our town. The tent city at the police station has been a disaster. Embarrassing for APD to have to deal with ignorant policies of the city and counsel.</p>
<p>I support having a homeless shelter so that police can enforce urban camping restrictions. Providing a safe place for our house less neighbors to sleep is a humane and it is the least we can do.</p>
<p>This is a much needed shelter and we could use more like it. Please keep this shelter open and I support more funding for more such shelters. Thank you.</p>
<p>Temporary shelters are greatly needed. But more than this I would like to see a tiny home project begun where people without homes could become homeowners. Life success begins with a home. Everyone deserves to have their basic needs met with dignity. And no more of those ugly tin cans as shelters! Let's make having a home inspiring and uplifting with building tiny homes.</p>
<p>I provided my mailing address in the form above but my home address is close to the proposed shelter just on Tolman Creek Road. I want to state that I emphatically support this shelter in this location. These folks are already walking around in this neighborhood and even camping wherever they can. It's heartbreaking seeing folks sleeping in freezing and near freezing weather just anywhere out in the open vulnerable to the weather and worse. I hope the City can go even further in providing shelter for the perpetual emergency that is living houseless and not just shelter for the immediate emergency of inclement weather even if that shelter is built right next door.</p>
<p>I am incredibly unhappy with the fact that there was no Pre-admittance vetting done to make sure we aren't housing criminals or sexual predators at the emergency shelter. We were told our houseless population wasn't that large and that most guests would be repeats so I think they NEED to be vetted more carefully. I still cannot believe that a location THIS close to a school was approved. Our south end of town is going to \$h"t. We need ordinances to keep the situation more contained and need to make sure mentally ill peoples are getting appropriate resources so they aren't just wandering around shouting profanities and putting themselves and others in danger.</p>
<p>Since the shelter has been consistently full since it was opened it shows the need to help those who are truly homeless.</p>
<p>I don't know how it's going because I haven't been in it since the open house. But I'm glad it's there. The unhoused residents of Ashland are my neighbors and I care about my neighbors. I live only about a mile from the shelter. Thank you City of Ashland for taking care of people who need you.</p>
<p>This is a very important service. The facility should remain open and the city should continue its relationship with OHRA. While the location may seem problematic to some it is near shopping and other services such as food stamps etc. Step up patrols of affected neighborhoods if security is a concern.</p>

area. A thorough study of the impact on neighboring businesses and neighborhoods should have been conducted prior to permitting and opening of the shelter. Although state and local leaders and non-profits try to help address the homeless problem in Oregon by creating shelters the fact of the matter is that shelters only function for limited hours and provide limited services. Outside of hours of shelter operations transients and homeless people who choose not to utilize shelters loiter in public parks business doorways and parking areas next to the freeway and anywhere in walking distance of the shelter and OHRA. These transient or unhoused people leave large amounts of litter human waste and drug paraphernalia everywhere they go. They also panhandle on sidewalks in parking lots and even inside stores. I've even been accosted inside Albertson's by a homeless man who tried to make me buy him ice cream or give him money during which time he had his hand down the front of his pants fondling himself. Although I reported the incident to store employees I am sure the young workers are overwhelmed as they have to deal with many similar situations each day as the location of their store is so nearby to the shelter and OHRA where the homeless congregate. Since the OHRA center opened a few years ago crime on the south side of Ashland has doubled especially theft from cars and property. My neighborhood on the edge of the city boundary has been experiencing increased mail theft and transients walking up my long private driveway and into my and my neighbor's yards begging for money or gas. I have even had a vehicle stolen from in front of my house. My steel fabrication business is located next to my home and just outside of city limits. I've had to install a fence security cameras and move my scrap steel dumpster behind the fence to deter thieves. We've had gasoline and diesel siphoned out of vehicles we are working on had catalytic converters stolen from vehicles and our security cameras show people still trying to steal scrap metal mail from our locked mailbox and searching around the outside of our buildings several times a week. Since the police department started clearing campers from their front yard a few weeks ago I see several homeless people pushing carts up Dead Indian Memorial Road every day and a tents have been popping up in the field across from my business. A few days ago I saw a homeless woman gathering sticks from the ditch across the street most likely to use to make a fire which could be hazardous due to dry overgrown brush in that area. Since the emergency shelter began operating in November there has been an increase in the number of people camping in their cars in the area. Often people car camp in the parking lot of my church on Clay St. without permission or make camps by the dumpster which makes me feel unsafe when I need to go to the

I applaud the attempt to provide more shelter of the type the city has acquired. I also would like to bring to your attention a program down in the Bay Area for car campers. It seems like a positive solution. See the link below. [Safe Parking \(thevillageoflove.org\)](http://thevillageoflove.org)

The shelter is a fantastic addition to our town. I am so proud of Ashland for stepping up and taking care of our homeless population. Folks are struggling right now with finding affordable housing. I think we serve them better by providing with a place to stay rather than locking them up. The shelter has only been there a month and they have been great neighbors. Ashland should commit to this shelter with all its heart.

Thanks to all involved for working so hard to provide shelter for those in need in our community. I have great respect for OHRA and how they work with respect for all.

Any shelter created to help people with little or no resources of their own is a good start and shows that Ashland is willing to work on a problem that is affecting the entire country right now. Ashland is an affluent progressive compassionate community. We need to keep it that way! Of course there are going to be troublemakers and anomalies in any project of this sort but we can't let them determine the overall success of the program. We need to set an example for the rest of the valley state and country and take care of those in need. I support anything the city does to help the less fortunate! Please let's show others how we can help each other.

The addition of another homeless shelter on the south side of Ashland has brought with it more problems for the residents on this side of town more crime more trash more panhandling etc. it also brings with it more homeless who cannot get into the shelter roaming the neighborhoods at all hours. We notice an increase in police sirens in our neighborhood since the 2 shelters have opened. Just ask the businesses on this side of town about the rise in crime and vandalism. Bimart had a number of people come in the other night and walk out with arm loads of merch and one who spread feces all over their restroom. I am sure it is lowering the property value of housing on this side of town. I just read about the homeless campground on East Main experiencing issues with security and rats. How long before they relocate the campground to our end of town too? Opening more shelters just brings more homeless to Ashland. When will we start addressing one of the main problems of the homeless and open more drug treatment facilities. Instead we spend millions on programs like the Stabbin Wagon who provide drug paraphernalia to enable the drug addicted in the name of health care. I do have empathy for the homeless but how about not putting them all on one side of town. The city wants to make sure they are not downtown to adversely affect tourism. So the south side of town doesn't matter.

I think what's important is our community and council are actively engaged in addressing this problem in a meaningful realistic way. When I read about the lights being turned out each night and the darkness & fear felt by the residents I wondered what would be a viable solution.

Would this be something that could be provided to those residing there?

For the first time in more than 4 years one family with young children have been continuously sheltered. I've seen remarkable changes in those kids. Please continue to offer this refuge after Jan 10. Please tell residents they have an extended period of time ASAP. Thank you.

Let it be known that we understand homelessness is a problem that our entire nation experiences and that should be addressed on many fronts from ental health to drug abuse to housing costs and more. Shelters are only a temporary solution and even at that can only work if the occupants choose to engage with them and the possible connections to services that may be presented there. That said the OHRA shelter has caused a serious problem in our commercial neighborhood bringing more homeless and drug use into the area than ever before. The problems and danger caused by a few unpredictable persons drawn to the area have resulted in many complaints and significantly increased our maintenance and management expense. We understand there is hardly an ideal place to locate a homeless shelter but the fact is that allowing homelessness to reach this level is a result of lack of barriers as much as a lack of supports. There should absolutely be safe and well-managed places where you can get connected to services to transition out of homelessness. However there also needs to be a level of commitment in the community that nuisance behavior loitering and drug use aren't acceptable on every streetcorner. It is the responsibility of the Ashland government and police force to enact and enforce regulations that care for and ensure the safety of all members of society.

I am totally against the homeless shelter after working with mentally disturbed people for over 40 years. I don't think it belongs in neighborhoods with children and the elderly. It will lower our property values and does not had to our community.

Help me understand why all of the homeless and low income facilities are in South Ashland. I no longer feel safe going to the Albertsons shopping center. I am always harassed by someone there especially around the subway outdoor bench. The other day some guy was melting down and threatening Folks in the parking lot. I am an older woman and I don't like feeling unsafe. I have observed folks on obviously stolen bicycles. Either they couldn't figure out how to write them or they were grown man on a kids bike. Crime is up in this area. Coincidence? I think not.

You screwed the pooch in this one.. all the while shutting down Pioneer hall all together!? 9 years ago I was at a kids birthday party with enough humans to blow your new "occupancy" numbers right out of the window. We all stood around on the patio while I tested how many hands I could put between the chimney and the exterior wall. Poor form Ashland.. such a disappointment after all the decades it took me to save enough to buy here.. Then to top it all off it ends up that (despite how you sell it) the school district just sucks. We are headed to greener pastures where water rates don't go up double digits a year. So sad.

I don't approve of our taxes going to fund this homeless enter. What happens when the grant money is gone? Are you going to ask the city tax payers to fund it?

It appears to be going well. OHRA has been competently managing the property and working with the guests there.

know are: Are the people who are facilitating the new shelter trauma informed? have two instances that I can name where it appears as if they are not. One was where I was contacted by a mother of a son who was living in the new shelter and the shelter attendant(s) were not listening to this man who needed to be moved away from the door due to PTSD issues. Thankfully Councilor Bloom and others stepped in to accommodate this man but this should have never gotten to this level. The shelter staff on-hand should have been able to accommodate this need immediately instead of it becoming a near crisis. The second one is that apparently the American flag was tattered at the shelter. Someone brought it up on social media and a local MAGA man — believing himself to be a hero — took it upon himself to donate to the shelter a new one. That is all fine and good; however when he was bragging about it online he said that shelter staff were saying bad things about the residents there. Something to the effect of that the residents deserved the tattered flag. Horrible. When staff aren't acting appropriately the whole system fails. People who are in trauma cannot regulate their systems. If we are going to do this as a City why half-ass things? Go all the way and do it right. Actually help people instead of just giving the impression you are helping. Also PLEASE put in a FULL kitchen regular bathrooms and showers and for fricksakes put UP the pallet shelters and use them! Again if we are going to do this go all the way and do it right. Another thing... let the Peace Meals (and other agencies) use the facility to feed people. What the hell is going on over there with you City Council Mayor and interim City Manager? Let the residents get fed. It makes zero sense to keep them away. I was in the Marine Corps for a long time. My very favorite Colonel used to say "This is the right thing to do." "This isn't necessarily the most popular thing to do the most efficient or even within Marine Corps guidelines but it's the right thing to do." He always always had his Marines best care in mind and always took the heat for us. He protected us. We used to say about him that we would follow him into battle naked with just a paper clip. This as you can imagine is the highest of praises. He was always making the very best decisions in the very worst of circumstances and had the highest of integrity and transparency. You should be doing the same. Protect all of us. Make decisions that are not beholden to only the wealthy. Communicate directly transparently and efficiently with everyone involved. Don't just relish in your titles LEAD with integrity. Please make the shelter a place of nurturing and healing. It's the only way to go. Do not buy into that bullshit that if we are kind we will attract every unhoused person from everywhere. It even isn't true. Please call me if you want to discuss more about what I see living here. [REDACTED]

The shelter seems to be doing great. I am happy that so many houseless people in Ashland are being taken care of during the cold weather. I support the city in this endeavor and I appreciate the efforts of everyone involved.

I can only speak on a few aspects that I've heard from other locals who are more informed. I think it's imperative that the shelter work in tandem with other non-profits and volunteer organizations like the community peace meals. It's lacks common sense not to. Most unhoused or low income family's have problems with reliable transportation so putting care and volunteer services all over town is not productive and creates the inability to access services. I've also heard that mental health care is not easily accessible through the services and that plays a HUGE role for all those who are struggling. These are basic common sense things that I think with a little imagination can happen. I know there's red tape and disagreements but I have hope that the community of Ashland can serve as an example for other cities.

I don't approve of our taxes going to fund this homeless enter. What happens when the grant money is gone? Are you going to ask the city tax payers to fund it?

I have volunteered with the community meals for many years and lived in Ashland from 1980-2015 so I'm very familiar with the ways the homeless have been treated over the years. The shelter is not sufficient because it has no kitchen (just a fridge and microwave) and no storage available in the garage area of the building. It does not solve the need for warmth and food except by using outside services for the people sheltered on cots in the front rooms. The shower and laundry trailer is inadequate for the needs of the unhoused. There is no place for people who are not in the front rooms to store their life-sustaining things. So when the emergency shelter is open they have to lug their stuff in and out. Ashland looks more and more like a third world country with people walking around carrying huge loads (like in shopping carts or on bikes). When I first volunteered at the original OHRA (next to the food bank) we had drop in hours at a facility which had a kitchen had a hallway filled with hanging clothes to give away computers to use a social services counselor. The new OHRA shelter is not serving the needs of enough people. The Ashland street building is leaving so many unhoused without basic help. And the lawn behind the police station is a complete failure both with its limited hours and with people needing to move in and out. As I said at a city council meeting years ago..... we take better care of stray dogs than of people. It's time to find better solutions. Let's not rely on laws to "control" the issue as the city council is trying to do. Why not collaborate with the many people who volunteer to help with this issue?

My understanding gleaned from information from Ashland PD is that the more services the city offers to indigent people the more people come here from Medford and elsewhere. There is an marked increase of crime and disorder happening all over our city. There is an increase of vandalism in the park sand elsewhere. I personally feel that Ashland should close this facility immediately. We should be using our money to pay off the city's debts to fix roads to fund more police and other civic tasks that affect everyone. It is unfortunate that Ashland is known for its free handouts for people who are not even among our own population.

The shelter is a much needed facility. The new location has low impact on neighborhoods. It is an important piece in the arsenal of care for the most disadvantaged among us.

Please keep it open while you work to improve it. Also please open Pioneer Hall. Thank you!

I toured the new Ashland Emergency Shelter space during the open house. State funding was used to purchase that property for an emergency shelter. It should remain an emergency shelter. The upcoming Master Plan for Homelessness will depend on the shelter's 30 beds. Still needed are laundry and kitchen spaces which should be added. The Emergency Weather Shelter space in the old garage of that building needs to be refinished as a real indoor space. According to the Point in Time Count of homeless people in Ashland we have about 120 homeless individuals on any given day of the year. OHRA can only accomodate about half of that number. The 30 beds in the emergency shelter also falls short of the actual need but the shortfall would be greater without the emergency shelter. Those beds in combinaton with OHRA's navigators who aid homeless clients provide Ashland's best option for improving conditions for houseless Ashlanders.

Why didn't the council (and temporary mayor) consider BEFORE buying and overpaying for the building (the comps were a lot lower than purchase price) there were only 2 bathrooms and no showers for all those people living there. This purchase was absolutely absurd although the idea for homing the homeless is wonderful!

It hasn't relieved any of the pressure to our neighborhood which is just a few blocks from the complex at 1175 E Main. The camping area has transformed our neighborhood and we don't feel safe walking around at night anymore. It's not the homelessness that bothers us. It's the menace and deterioration of safety in our working class neighborhood. Please help.

My concern is that this is close to the Waldorf school (Siskiyou School) while not all unhoused but many are taking illegal drugs safety is a concern. Ashland is actually attracting people due to the shelter the unhoused population was actually very small in Ashland many were young adults enjoying the hobo life seeking and adventure. Moving on when the weather turned cold. I only know this from a small conversation with a couple on the Ashland plaza when I tried to hire them for work. What kind of security do we have with the this shelter? Identification of sexual predators ? How do you I.D. These individuals? I also see that every street corner and driveway into the shopping areas (in that area) has a person looking for a hand out which is new.

I am so pleased that this location will be available. It is a perfect location for such services as other supporting agencies are nearby. Thank you for being community-minded and thinking of the entirety of the citizens of Ashland.

I'm opposed to a second shelter opening up in south Ashland. When the first shelter opened at 2350 Ashland St. I saw a dramatic increase in the homeless population in south Ashland. It has impacted local businesses and has made it unpleasant to shop on that side of town. There's more litter and shopping carts full of personal belongs left out on the sidewalks. There are groups of unsavory people hanging out in area that have filtered into the surrounding neighborhoods. I worry about children in our neighborhood coming into contact with someone that could do them harm. I'm also worried about my house and car being burglarized. Six years ago when I moved to south Ashland I had none of those worries. The homeless population in Ashland keeps increasing due to the expansion of homelessness services. More and more out of area homeless are coming to Ashland because of the increase in services. If the majority of residents in Ashland want to expand services to the homeless then it is only fair to build the second shelter in the north end of town. It is not right to make the south end of town where I live into a homeless destination. I want to stress it is not fair to put all of the homeless in south Ashland. Build or buy the second shelter on the north side of town. Make this equitably for all of the residents of Ashland. Thank you [REDACTED]

This shelter is vitally important to the welfare of the community. It saves lives. The location structure and profession staff offers the best situation for the concerns of the housed population. While still providing vital resources for the unhoused members of our community. It would be an act of callous neglect rising to the level of a moral imperative to remove this resource. Thank you for your consideration towards this issue.

I live right by the shelter and it hasn't been a problem at all. I hope it is helping our unhoused community members.

I am glad we have found a permanent location for a shelter in town. Despite others concerns I think the location near the grocery store and other resources is the best that could be found. We had the temporary shelter next door to our home for almost a year and found that Rogue Retreat managed it well despite challenges with the location (no city sewer no sidewalks long walk to resources). Thank you for your hardwork making this happen!

town is not right. Since OHRA went in the south exit area has become an ever-increasing transient wasteland nothing but drug use and vagrancy and blight. Burning tax dollars enabling and rewarding losers and dirtbags and takers will not make Ashland better. Your actions are only making the problem worse and you are destroying the quality of life for taxpayers in Ashland and our town much less attractive. Put the homeless on busses and send them all to Portland. Way more concentrated homeless resources there. Let Tina Kotec deal with it. More humane to send them to the big city so we can get our nice quaint beautiful mountain town back. The more you cater to the homeless the more you will encourage them to settle here. The bird feeder effect is real. Oregon should end the bottle drop and outlaw Narcan. If someone wants to OD let em. You are only making Ashland worse with this shelter. Instead make it high-density work force house for young adults and families and the elderly. People who actually contribute to society pay taxes and make Ashland a better community and a better place to live. Why are you making Ashland more livable for homeless drug addicts and less livable for actual taxpayers? Spending my tax dollars subsidizing the lifestyles of people who make bad decisions and don't have personal responsibility break laws use drugs commit crimes when you could be using that money to subsidize housing for workforce young adults and the elderly is totally criminal and you should be ashamed. You used tax dollars to overpay for a building without doing due diligence and to top it off you used tax dollars to build them a smoking area!? Are you fucking kidding me!? Do the right thing and resign now Mayor and City Council!

I live right by the shelter and it hasn't been a problem at all. I hope it is helping our unhoused community members.

The shelter is doing amazing. They've been taking people in during extreme temperatures at night to prevent them from freezing or worse. They offer help with so many things that I can't keep track. Most importantly it's giving these people a chance to get back on their feet and a safe place to do so. Otherwise countless people have to return to the streets homes with violence and many other situations. The shelter gives them a safe haven to recover

Hello. Homelessness is a systemic problem and no city can or should be tasked with solving the issue on its own. However you can avoid passing stupid classist laws that do absolutely nothing to solve the problem and accomplish nothing but create a bunch of additional personal problems for people who are already experiencing a serious over-abundance of personal problems to begin with. Rather than blaming the Wall Street vulture funds who are responsible for the inflated value of real estate these days (several of them were recently indicted by the feds for artificially inflating real estate prices in fact) but instead you blame the victims of this paradigm and basically try to criminalize being too poor to pay rent. There have been scores of studies done on homelessness and while they have been of various levels of credibility and while they have focused upon different aspects of the issue one thing they are unanimous on is that the cheapest and most effective method of ending homelessness is to place homeless people into homes. Most effective — lowest cost. Win win. Yes placing people into homes is expensive — but it is literally cheaper than just leaving them on the streets. (It is also more humane but that is evidently irrelevant in American politics these days...) I considered sending you links to the documentation for all this but this information is not that hard to find and I suspect you would feel better with information you researched on your own. While there are exceptions homeless people can be divided roughly into two types: Those who have fallen through an economic crack (medical bills or unexpected car repairs or whatever) and generally all such folks need is some subsidized housing for a temporary period of time until they get caught up. Then there are the chronically unhoused usually due to some form of mental illness and/or drug addiction and such people usually require semi-permanent or permanent supportive housing. Yes that is expensive — but again it is STILL cheaper than just leaving people on the streets.

Having 2 shelters in my neighborhood has affected the value of my home. I'd like the city to mitigate the damage. There has been an increase by more than 80% in number of homeless people near the shelter property and visible from our homes. At least 7 emergency vehicles with sirens and flashing lights the first 33 days of operation. Woefully understaffed especially since children are there. The portable toilets violate AMC. Not one councillor has responded to my emails about this. There are multiple fire code violations. There is no kitchen so even more violations with the 5 small appliances plugged in. Teachers can't have even one microwave in our classrooms (in bldgs. with sprinklers) so how is it OK for all those appliances to be there? A legal appropriate shelter for 33 people would have at least one kitchen and at least 6 flush toilets as well as indoor showers. And not violate any fire codes. If the city of Ashland (the smallest in Oregon with this many beds) must have 90-96 beds for homeless please don't put them both in our small neighborhood. I'm waiting for the city to mitigate the damage and move the shelter to another neighborhood before I try to sell my house. It's not going well and I hope it moves by January 10.

I have had a long connection with someone who has worked at the shelters since they opened and when he tells me how vital they are to the homeless community I believe him. These shelters are absolutely essential

Unless I personally ask Gina DuQuenne what the news is I feel like tax-paying citizens are purposefully being ignored. Thankfully the South Ashland Coalition is getting the word out about the shelter and other items affecting our end of town. I say if you want to living voluntarily unhoused in Ashland there should be some sort of work fare program to give back to the TAX paying citizens of the city. Like sweeping sidewalks and public areas.

Please reconsider the homeless shelter nearby my work. Every day and I mean EVERY single day my clients my fellow businesses & myself have to deal with the negative ramifications of the homeless nearby who bring vile & hostile attitudes drugs & mental illness into our work complex and homes. I sincerely hope you would reconsider how our businesses might be negatively perceived by clients and prospects for maintaining our businesses in a neighborhood now riddled & deemed UNSAFE & unacceptable. In the past 2 years my neighbors and myself have witnessed way too many examples of the homeless actually doing drugs in the open air sleeping & defecating on our streets while children & clients are nearby. This is not acceptable. Please stop this initiative to bring in even more homeless into a sole and single location of our city - you have purposely attracted and creating an unhealthy environment to all of the southern Ashland area. Your behavior has not been representative of those who live and work here and I plead you will correct what you have done.

As a resident living near the shelter I've noticed a few more unhoused near Albertsons Shopping Kart and Bi-Mart; places where I frequent. I've also noticed more camped out along I-5 at Exit 14 when going to and from Medford. We live in a small HOA community with a lot of elderly individuals and I am concerned about their safety as we've had a few instances of someone knocking on front windows and kicking front doors in the middle of the night. I'm not saying this was done by the unhoused as I have compassion for them. Just wondering when the police substation might be installed for greater police presence in our area. I greatly appreciate what the city has done with having a place by city hall for overnight tents and by passing the first draft of the common sense camping ordinance. And I appreciate your asking residents for input.

I live in the Clay Creek Gardens neighborhood and frequently shop at Shop N Kart and BiMart. I notice more travelers/unsheltered/homeless people in the BiMart restrooms recently and often find the restroom conditions to be less than clean. Staff are aware I believe and I think they are reinstating the requirement to show one's membership card. Related: I deliver Meals on Wheels every week; one of our rules is that no food may be returned to the senior center. So if a client is not at home what does one do? In the past I have been able to find folks on the street or in the BiMart parking lot. Those numbers seem to have decreased (weather? the shelter?). On two occasions I dropped by OHRA to deliver extra food and on both occasions I had unpleasant (and uncomfortable) encounters with people (residents?) hanging around the entrance. I no longer will attempt to do so. Anecdotally my impression is there are more travelers/unsheltered/homeless people on the Ashland Street and Tolman Creek Rd. sidewalks in some cases blocking pedestrian right of way. Not a great advertising tool for the city and it's dangerous when pedestrians are forced to step into the street. This has occurred all the way up to Goodwill. Finally IMHO the city failed to give proper notice re the project. Too late now and I suspect you've heard it before but I believe somebody pulled the switch too soon. My problem is that the decision was made knowingly - one can list reasons why but the bottom line is that the City knowingly gave more value to those reasons than to giving adequate public notice.

I'm opposed to a second shelter opening up in south Ashland. When the first shelter opened at 2350 Ashland St. I saw a dramatic increase in the homeless population in south Ashland. It has impacted local businesses and has made it unpleasant to shop on that side of town. There's more litter and shopping carts full of personal belongings left out on the sidewalks. There are groups of unsavory people hanging out in area that have filtered into the surrounding neighborhoods. I worry about children in our neighborhood coming into contact with someone that could do them harm. I'm also worried about my house and car being burglarized. Six years ago when I moved to south Ashland I had none of those worries. The homeless population in Ashland keeps increasing due to the expansion of homelessness services. More and more out of area homeless are coming to Ashland because of the increase in services. If the majority of residents in Ashland want to expand services to the homeless then it is only fair to build the second shelter in the north end of town. It is not right to make the south end of town where I live into a homeless destination. I want to stress it is not fair to put all of the homeless in south Ashland. Build or buy the second shelter on the north side of town. Make this equitably for all of the residents of Ashland. Thank you [REDACTED]

7:30am walked past Albertsons's on the way to the gym and watch a woman drop her pants and lean on the side of Albertsons and take a shit .. I called to cops and zero was done. Being nice and giving services to the homeless gets you actions like this. We are now a magnet a shelter for all or the homeless In the valley. Begging is not a job.... South ashland is full of trash on the the ground and unsafe for kids to walk 100 yards at night anywhere near ymca shop n kart Albertsons Because of the homeless

I'm glad the City of Ashland is providing basic shelter for some of our unhoused community members. It is my understanding that there is no kitchen in this shelter. That makes it difficult to provide a meal to the residents. Volunteers are asked to bring hot food or food that can be microwaved. I would ask the City of Ashland to fund the building of a kitchen in this building. Thank you. [REDACTED]

I think its a great idea for a homeless shelter...let us be more caring individuals for the less fortunate.. They need a place to go too..

I have had no direct contact or interaction with the shelter or any of it's staff or residents but I am happy that the Ashland is able to provide shelter for many of the people who have been living in tents around town. I am hopeful that through the shelter people who want permanent homes can get assistance in finding a place to live. I am also hopeful that mental health services can be provided to people who need it. For people who choose to live outside refusing services I hope that they come to understand that it is not the town of Ashland's responsibility to provide space for them to sleep. If their choice is to live outside when there is adequate shelter available the City should no longer tolerate the setting up of tents in city limits sleeping on sidewalks in storefronts or over night within city parks.

I don't know how it is currently going but I know that more shelters beds hygiene facilities and safe spaces for our unhoused community is absolutely essential and is underfunded and understaffed. The city needs to devote more resources and space to helping our community members in need.

I am uncomfortable with this aggressive purchase driven by grant monies. I feel that it is made for resentments when stakeholders are left out of the process. I do not trust the council or mayor sadly. I think expenditures that feel short sighted breed this mistrust. What funds will sustain this and do the work on windows etc. to be fire safe. I really worry about fires.

I think this was a terribly short sighted and poorly planned move by the city. First you overpaid for the property without proper procedure. No estimate or formal appraisal. Why? Next you did little to inform the surrounding community or get approval until the last minute. Then no cost analysis like a 5 and 10 year plan for funding /budget. I will bet funding / grant money runs out quickly and you will be looking to have the residents of Ashland foot the bill through a bond measure or tax because the city rushed into an ill-advised plan because they had grant money to save the homeless people. Next let's look at the liability this puts the city and its residents in! This backs up to the bike path used by many kids and adults. It will take one accident to have an attorney sharpening his claws to file a liable suit against the city that will add to the cities debt then we will see our insurance cost go sky high! Then let's talk about the crime this will bring to the surrounding community not to mention the drop in property value for peoples whose homes back up to this shelter. Again why the hell wasn't this all considered? Now all that said I realize these people which a large portion have mental health issues and drug addiction or warrants but sanctioning and supporting this behavior is not how the problem will be fixed. Tolerance will only increase the problem as we have seen throughout the country. This question should have been asked before this ill-fated scheme was hatched and put on an already struggling community. My feelings are the shelter should be shut down and building put up for sale. This is a federal issue that will need funding that can be distributed to states for projects. Like increased low security prisons mental health facilities and rehab centers along with job placement centers. Giving people a place to sleep doesn't fix the problem! Feel free to contact me. [REDACTED]

The primary thing I've heard about the new homeless shelter facility is that OHRA runs it. It's also new to me that there are 30+ people staying there on a regular basis. I'm certain that the shelter proves better than sleeping rough. OHRA has a proven history in Ashland with its work at the former Super 8 facility. It's probably a good plan for Ashland to go with a local concern that has a proven track record. It would be good to have more information about public expenditures on the project. The projects implementation needs to be effective rather than vague secretive or chaotic. It would erode public support to learn if the cost per client per night was exorbitant. The City of Ashland needs to better articulate the design and implementation of their intermediate plans. Decisions seem to made in a vacuum with the public only informed afterwards.

I have not noticed any negative issues regarding this newest shelter for the unhoused people of Ashland. It is extremely important for all people to have adequate and safe housing. Homeless peoples lives matter too! Keep up the good work Ashland!

I've worked as a social worker since 1980. Last 21 years with mentally-ill homeless. I'm concerned that Ashland is overly pandering to the homeless mentally-ill and those content with living off of free handouts. Society doesn't function that way. People need to engage and contribute. Ashlands quality of life is degrading due to residents feeling good about themselves by temporarily housing and feeding those less fortunate. Ashland relies upon tourism and attracting homeless and those that take advantage of free handouts is a mistake. County/State government must step in and be tasked with addressing this societal epidemic. As a tax-paying citizen please hear my plea of "no more!" Respectfully submitted [REDACTED]

The Ashland street location is ideal for a shelter. The shelter needs to be centrally located so the people who use it can easily get to it. The shelter needs to go somewhere and this location effects as few of residents as possible since it is sandwiched between the railroad tracks/Ashland street/commercial parking lot. I don't know how the City is going to fund the shelter but it is not sustainable to make the citizens of Ashland to fund this project long term. There are already too many items on my property tax and utility bills for City and school projects.

I feel the South Ashland shelter is going well and it is good to see the city using under-utilized resources to support the worthy cause of helping our least fortunate neighbors. I shop at Shop and Kart and Bi Mart and don't encounter any more issues than I have in the last 10 years. This is a far better approach to addressing homelessness than the alternatives.

congratulations to the city for getting this shelter operating. it is an important accomplishment. [REDACTED]

I wish it were able to accommodate more people.

I have a lot of experience with addiction mental health issues and homelessness. Been there. Done that. I'll have 22 years clean tomorrow. I've been homeless. I've dealt with mental health issues since childhood and been in weekly therapy with the same psychiatrist since March 1998. Let's stop the ridiculous levels of enabling and get to some real solution. I rarely align myself with Southern politics but Georgia is getting this right.

<https://www.city-journal.org/article/georgia-takes-a-stand-on-homeless-policy>

Suggest the shelter be improved to be all electric and truly energy resilient. Neighbors will have more comfort knowing there won't be potentially dangerous people forced out to look for shelter when the grid goes down

Please continue. These people need help. A tiny home community would be ideal but until something better is available provide night-time shelter all year not just winter.

My concern is that Ashland have constancy of policy with the other cities in the Valley so we do not become a magnet competing with the other cities to provide shelter for the transient homeless population. I would not want Ashland to draw people to our shelter from other cities just because our policy and resources are not constant with the other cities in the valley.

The shelter has completed the goal to visually give over south Ashland (near Tolman intersection with 99) to people with no connection to Ashland except the desire to be homeless here. It's a goal that is at odds with creating a vibrant neighborhood a strong tax base a place for children to ride bikes and families and seniors to walk. I don't agree with this goal. Furthermore as a mother who was previously homeless in Ashland decades ago living out of a van with my family I find the current practice of encouraging homeless people to stay here to be remarkably cruel: this is not a place you will succeed if you're poor. The effort will beat you down no matter the help given. The salary to expense ratio is impossible. My family and I succeeded in getting housing and changing our lives for the better only by going to where the Jobs were (Corvallis and Seattle) and working very hard to build a solid financial base for ourselves. Only then did we return to Ashland. Was it disappointing not to be able to stay the first time? Absolutely. Was it for the best in the long run? Absolutely. Have some Real compassion for those of us with less: help us move on to somewhere where success is actually possible.

I think it is a wonderful idea and I appreciate that action is being taken to help the un housed to have shelter and a safe and warm a place to sleep at night. I know there is a lot of resistance from those in the neighborhood but really it is an ideal location.

Heard/read from neighbors that it is not going well. Employees of the stores/businesses along with customers have voiced that it's been "dicey" at times. Definitely creating a different vibe/atmosphere than the rest of the town. And that causes some to avoid the area and take their business elsewhere.

I think it is a wonderful idea and I appreciate that action is being taken to help the un housed to have shelter and a safe and warm a place to sleep at night. I know there is a lot of resistance from those in the neighborhood but really it is an ideal location.

I believe providing a place for the unhoused is the right thing to do. I hope that once this up and running to capacity we can stop providing the tent camping area on East Main st.

The shelter is a great temporary situation but the staff at the shelter are not properly trained and supported by management to function and hold space for 30 unhoused friends. There needs to be more mental health support access and sliding them in long term housing faster. And the OHRA staff need to be paid and trained for the enormous space you are holding with that group. In a small building. With different attitudes and health concerns and ptsd breakdowns and nightmare screams and unstable minds and and....positive changes have happened AND Ashland can do much better.

I do not have the patience to deal with entitlement anymore. This shelter is nothing more than giving into folks who feel entitled to buck the norm and want their cake and want to eat it too. You can lead a horse to water but in this case they feel that they identify as a camel. There used to be this thing called cause and effect. If you did something wrong there were consequences for it not a participation trophy. Life isn't fair and the sooner we all understand that we can move on as a society. Stop using my tax money on indigent folks who don't want to change. And in the literal sense of the word we are turning SA into a ghetto (ghetto - noun - a poor urban area occupied primarily by a minority group or groups). We have to be honest with ourselves. I had a discussion with a person who told me that they couldn't get housing for her and her child. I was able to find shelter in about 20 minutes. Then the story changed and they then had a dog. Found shelter for the dog and them in another 20 minutes. Then the topper of the cake it has a 20 year old child. That isn't a child that is a grown adult and the person was trying to get sympathy for not being able to find shelter. Well having the whole information from the beginning helps and I could find shelter for her but not her adult child. She didn't want that either. In an hour I had found several solutions but they didn't want it. I am not completely cold hearted but this is the kind of nonsense that takes me away from being an ally. Do not use my tax money on the shelter; and don't tell me it won't because in one shape or another it will be funneled towards it. No to the SA Ghetto! Yes to living with consequences and repeatedly doing the same thing over and over again and expecting a different outcome; that is the definition of insanity.

I think that shelter for our population in need is critical especially this time of year. Please continue offering it without gaps however possible whenever needed. It is clear some discomforts may occur within the community as things adjust and we learn how to support all residents but I feel things will settle and be perfectly functional in time. Thanks!

I feel this is a good site close to shopping transportation to medical facilities and somewhat out of the way. No place would be perfect and someone will always complain.. The city did a good job picking it. Keep it open.

I haven't heard any complaints. The OHRA folks have helped a lot of people.

As far as I know the shelter is going well. I have not heard any complaints from Neighbors. I hope it continues!

Shelter. Perhaps an update from OHRA the City and some of the homeless people who have used the shelter would be appropriate. Maybe even a meeting that could be attended by the residents to get feedback from all the players.

I'm not aware of how the shelter is doing now that it is operating. I only followed the controversy in the roll out. No doubt we have a chronic Homeless problem. It seems to be a whole social group. Those who choose to endure the winter may not want to be confined in a shelter with conditions and restrictions. I know personally what a good job OHRA has done with the transitional housing at the old super 8. But if you offer services you will attract more need. "If you feed pigeons you get more pigeons". There a lot of people who drop in there. They would love to get a on there but it's not possible. They give other support for the drop in clientele. A mailbox a sandwich directions to services showers medical and dental services.... There are lot of services that are not available for the poor. If ashland is the most generous and supportive community in the rogue valley we let others off the hook. Ashland is probably the most fun and tolerant. I don't see the populations in talent Phoenix central point congregating like Ashland. Medford does have st Vincent de Paul and the other shelters services that brings people in. There is a different group that gets services there. But I meet homeless that are on the road. Travel to Seattle Portland Eugene Santa Monica. Others stay here permanently unhoused. I just read Oregon is number 2 nationally in homeless population <https://www.koin.com/news/homeless/federal-report-shows-oregon-has-second-highest-percentage-of-unsheltered-homelessness/amp/> We need more permanent housing built. Housing First! I am most concerned about women children and those with diminished capacity. There are some that prefer being Gypsies. Others struck by a series (lifetime) of misfortunes. The Ashland issue is putting all the chronic housing crisis on Ashland Street and that neighborhood. Lots of people milling around. An Emergency shelter in winter is an emergency solution. It's not an end all and be all. Not sure what neighborhood would accept the responsibility and give up their safety and wellbeing. It's always going to be a NIMBY problem. If there are 5 000 homeless in the state and ashland is 22 000 : 4 000 000 we would have 25 homeless wandering our streets proportionally. We're lucky Texas is sending us additional asylum seekers to house. It's a national problem. We want to be kind but the burden is currently all placed on the south ashland neighborhood the police and our parks. We need to redistribute the nations wealth and stop pushing the middle class downward. Start by creating affordable housing and universal medical care. That's obviously easier said than done.

I haven't heard any complaints. The OHRA folks have helped a lot of people.

I think it is in a great location and is a good use of existing building space. Bravo

I think it is a wonderful idea and I appreciate that action is being taken to help the un housed to have shelter and a safe and warm a place to sleep at night. I know there is a lot of resistance from those in the neighborhood but really it is an ideal location.

Since the 2200 shelter has opened my family has seen first-hand a significant decline of the health safety and cleanliness of our neighborhood and the bike path. We were told the shelter would improve the neighborhood but it has been the exact opposite. We have seen a sharp increase in drug use under the bridge litter illegal camping and inappropriate behavior including multiple instances of public urination on shelter property in full view of my children's bedrooms. Our car has been vandalized along with many of our neighbors. My children have been awakened at night by people yelling on the bike path right by the shelter. We used to love living by the bike path but now it doesn't feel like a safe place to raise a family and we are looking to move out of the area completely. I would urge the city NOT to continue the shelter. There are other options for unhoused folks to go to the original OHRA or Rogue Retreat in Medford. Our south Ashland community will continue be adversely impacted if this 2200 shelter continues.

Since the shelter opened the neighborhood and bike path around it has become a magnet for litter drug use public urination (on the shelter property witnessed from my daughter's room) defecation and prostitution. I was told that it would get better having another shelter open. It has not. My family will soon be moving away from the area. I have lived in south Ashland for close to 40 years but now I don't want to raise my family in south Ashland. This makes me sad.

How can we know how it's going unless we are there? What I'd like to know is how many homeless people are not getting shelter. That would be hard to find outyou'd need to go street to street in Ashland to find people sleeping on benches wherever hoping the police don't find them. I do think that there should be a law that police cannot disturb a homeless person who is sleeping somewhere. Of what value is it to force a homeless person to try to find another place to sleep? I think it's a heartless rule that the homeless be awakened & forced to move.

GREAT the answer to homelessness is to make housing. We need a lot more housing but this is a start. Thank

I think it is good to have it. That said there are issues that could be addressed. Requesting mandatory drug testing and for those that come up positive they are least separated from those families and those with mental health issues. Mental health issues and the fear that goes along with it are made that much worse with sleep deprivation when you do not feel safe sleeping in the shelter. Unless I am missing something OHRA only provides information about resources. There are no case management services similar to Rogue Retreat. Why not use the property behind the shelter for screened applicant tiny homes also. Please keep it open. I know of a couple of people there that although it is the bare minimum it does keep them off the streets where they do not have the mental health capacity to survive.

I am a resident of South Ashland. The Camping Ordinance that was sent for a second reading is impressive in its compassion toward the unhoused citizens of Ashland. It is impressive in its compassion for the needs of the larger community and business owners of South Ashland. It is impressive for its attention to the complexities of existing law. It should be passed so that the Master Plan Committee has it to work on. Please VOTE YES on the Prohibited Camping Ordinance. My observation is that the shelter at 2200 Ashland Street is operating well and our neighborhood is safer because of it.

I live close to the shelter and have experienced no adverse occurrences. I really feel that Ashland needs to extend the service as we still have unhoused people who need transitional housing to get them on their feet towards independent living. Currently there are 2 single mothers with young children residing in the shelter so it is really important not to close the facility.

The shelter is a much needed facility. The new location has low impact on neighborhoods. It is an important piece in the arsenal of care for the most disadvantaged among us.

I am very grateful to my city for having created this place. As the last couple of years have gone by and I did not see any large scale action to provide a shelter in a permanent location I found myself frustrated about what appeared to be inactivity. With this new shelter I feel that ASHLAND has done something significant and meaningful and I applaud the inception of the idea and now the existence of this dwelling! Thank you from a citizen of Ashland.

I cannot comment on the inner workings of the Homeless Shelter but the effect on the greater community. The shelter attracts many others that hang about the facility. Some create a lot of trash some disrupt traffic and others are very aggressive My car was accost.ed by a homeless person who was clearly mentally ill. This happened while I was at a stop sign waiting to turn into Hwy 66. I have witnessed other incidents during my strolls in the neighborhood and while shopping or using services. It seems like the city is siting all assist for the homeless and people with mental health issues on the south side of town. This is unfair to us residents who reside in the south end of town deserve the same safety & quality of life as the rest of town. Use The Grove site something at the center and north ends of town. Stop using the south end of town for every "NewWave"idea that the council has. Thank you

I think it will help to address the homeless problem in our community. We need additional shelters. This is a problem that affects all of us and we must all do our part to remedy the problem.

The current shelter: It's not an appropriate building or location. There are multiple fire code violations. The portable toilets violate municipal code. A legal appropriate shelter for 33 people would not violate any fire codes would have at least one kitchen and at least 6 flush toilets as well as indoor showers. If it had a kitchen it could also host the Thanksgiving and Christmas peace meals that are lacking a place for this. In addition It's not fair to neighbors to put two shelters in one neighborhood.

From everything I understand the shelter is not only inadequate but ill appointed. It Does not seem to be solving any problems and bringing the neighborhood property owners more trouble. I think it should be closed and another solution explored. It is not solving the problem. It is not meeting the need. And I understand. It is not meeting code either.

The shelter is a much needed facility. The new location has low impact on neighborhoods. It is an important piece in the arsenal of care for the most disadvantaged among us.

Please do not change the temperature requirements for the emergency weather shelter. The current requirements are reasonable and humane. I would like to see cost accounting for the shelter made public.

Operation has not been an issue for us other than it seems to have resulted in closure of backway across rail tracks to get to Shopping Kart and BiMart. Do think there was a real lack of communication on this prior to the location decision and wonder why we have 2 of these types of facilities located now in the same area of the city.

I feel the shelter is going terrible. Men peeing in the field facing my granddaughters window. The other night grandson called his dad into his room because two homeless people yelling and saying they were going to kill each other. This was on the bike path next to the house. There was a guy walking with a machete. Garbage under the bridge again. Guy doing drugs putting a plastic bag over his head so he gets a higher high. Lots of things going on on that end of town up and down the whole street. This is no place for homeless shelter. It's just attracting more and more homeless. They're walking up and down the street and on the corner by the freeway . So many stories from neighbors and people that just see the homeless out there. People plus my family members they want to sell and move somewhere else because this isn't being taken care of. But now property values have gone down because of this. I won't take my grandkids down that bike path is too dangerous. And it won't help to just put up walls by the Porta potties. The people are just going out in the field. Makes me so sad. We've been here for 45 years and to see our little town going in this direction. Some people on the city council need to know what's right and wrong and stand by it. Letting the marijuana stores open up one everywhere you think that helps the drugs around here? And then opening up a store for those magic mushrooms you know where that's going just like the marijuana store. What do you want for your kids? Please consider moving this to a different location.

Have noticed a lot of people using my apartment parking lot and taking advantage of our trash area and generally hanging around and acting sketchy. Have seen multiple people urinating and defecating on the streets or loitering around and making people uncomfortable. Personally I feel unsafe and don't like to walk in this general area anymore. Upsetting to see my once charming neighborhood turn into such a mess.

Including a note for 20 years with a high interest rate. Some cities turned down the money until they were adequately prepared to handle this huge undertaking both financial and moral issues that we now face! Some of the money came from the state and there is expectation and hopes that more money will come from the state but to date we do not have that assured nor the amount. The unnamed Shelter has legal issues for occupancy being a sprinkler system along with window replacement for egress that to date have not been fully addressed other than to pay \$25/hr for a walk around at night. Has there been an RFP to address these issues? The RFP for Pioneer Hall sprinkler system alone was astronomical. Now they have plans to build a covered smoking area! We own this building for ten more years and could never recoup the cost if we decided to sell. I look at this Shelter for 30 people as a continuing huge cost to our city for years to come. Please tell we citizens how we are to continue this cost and where the money will come from in the event our Gov Kotek runs out of funds or sends the funds else where? Ten more years? I feel there should have better judgement and planning before rushing into this complex and over priced building. Time for the Administration Mayor and councilors to explain how ...you ..will handle this and at what cost closed we citizens! Driving thru the shelter I have seen the dumpster overflowing with huge bags of overhanging garbage blowing in the wind with trash and crows everywhere picking trash and ripping the bags. All the while some setting in circles in the yard smoking cigarettes! The flimsy see thru panels held down with sand bags...is not covering the porta pots shower trailer and the table they sit out with a coffee pot for all to enjoy. Are there goals to find employment for housing educating the children there and a path to move forward for people being housed and fed on our behalf? Does ORAH staff have the qualifications to guide ones with drug and or mental issues? Regarding the inclement weather portion of the shelter there has been an influx of people heading to Hunter Park after morning hours 9:00am.. Over the last few days several have been ticketed for storing huge amounts of belongings and sleeping again in the dugouts at Hunter Pk. The city needs to direct its attention for another Dusk to Dawn type area Hooefully towards the North side of town to accomodate the unhoused. My biggest wish is everyone at the shelter pulls their weight works along with the guidance of ORHA.....be able to help themseves and find a place to live respect and be grateful. Learning to help themselves and not only looking for someone else to take care of them. Now is the time we are waiting for feedback from the city the financial planning and the expectations and what to do next!! The best for all....Were Better

I'm not happy with the shelter. It was thrust upon us and we already have the OHRA shelter with its own issues. Men publicly urinating in yards drug use the mental illness just to name a few. We were told we'd have added neighborhood patrols and I've seen none.

We were apprehensive about the shelter since we live in such close proximity to 2200 Ashland St. We still feel frustration with the lack of transparency in the process for purchasing the building the amount paid and the fact that the building itself is not up to code. However the shelter itself has not created disruption for us personally. We are glad that it is providing people with an opportunity to transition into more permanent housing and to provide warmth and protection for the emergency weather shelter on the coldest nights. We still have concerns about the potential noise foot traffic and congregation in warmer weather but so far during these cold months it has been fine. There does seem to be more congregation around the bike path and outside of the shelter property when residents of the shelter meet up with non-residents and on shower days and inclement weather days there's more foot traffic. It hasn't really been an issue for us though. We still think it is very important to address the lighting and fencing at the underpass which we think would alleviate some of the ongoing issues. In the past week there was a series of car break-ins overnight in our neighborhood which is concerning but there's not necessarily any connection to the shelter. There have been a few emergency vehicle calls to the shelter which is somewhat disruptive but we appreciate that the vehicles cut their sirens as soon as they turn into the lot. We still have flashing emergency lights in our living room and dining room windows but at least we aren't listening to sirens. We would like to see more economic development in south Ashland and are glad that there will be an increased police presence which can hopefully help this part of town feel more livable and inviting to entrepreneurs and to current and potential businesses.

I think is a great example for other places where there's a system that provides specific services for specific population I think also it is an outlet to families in housing transition to receive specialized support

The shelter in Ashland is providing a critical service to the community. We need it to support people in this area experiencing hard times. The passionate staff deeply care and make a difference in these people's lives helping them to achieve some stability and a path to a better life.

I'm opposed to it. Even though Ashlanders are a kind and generous group. Ashland should be attempting to to attract more tourists than providing more services that attract more homeless.
